HYALURONIC ACID

### REPLENISH THE GOOD

After removing dirt and oils, it's important that your skin retains all of the moisture it needs to stay hydrated for a clear complexion. Applying toner after washing your face can help rebalance the skin's pH, making it easier to absorb serums and creams while tightening pores.

### STAY COOL

No matter how stressful your day may be, you can cool off and replenish when you need a refresher. Full of soothing antioxidants and natural ingredients, you don't have to worry about unwanted breakouts, redness or irritation.

### YOUR SOLUTION FOR:

- Hydrating and moisturizing
- Improving the look of pores
- Reducing visible signs of aging
