

PURITII®

BREATHING IS BELIEVING

PURITII® MULTI-EFFECT AIR PURIFIER

From your home to your office, keep your spaces protected from every angle with the 360-degree Puritii® Multi-Effect Air Purifier — designed to improve your air quality with the most advanced purification technology available. This sleek yet functional filtration system combats air pollutants while removing up to 99.99% of microbes, plus more than 99.99% of ultrafine airborne particulate matter measuring less than 2.5 micrometers and from 0.1-.03 microns. It can also significantly reduce harmful pollutants such as emerging contaminants, chemicals, allergens, VOCs and more.

FILTER OUT THE BAD STUFF

PET DANDER

HAIR

DUST

POLLEN

POLLUTANTS

ODORS

INTELLIGENT TECHNOLOGY

The Puritii Multi-Effect Air Purifier is smart enough to monitor your air quality in real time and make adjustments to the filtration level. The remote control and touch screen control panel make it easy for you to customize your air filtration, including cleaning and filter replacement, on-off settings and speed controls.

WIDE-RANGE FILTRATION

This sleek machine packs a ton of power, purifying up to 426.9 cubic feet per minute. One unit can successfully filter the air within a space that's as big as a tennis court! By utilizing a circular, multi-stage filter, made from a combination of metal and polymer meshes, activated carbon, H13 HEPA filter and zeolite, the Puritii Multi-Effect Air Purifier provides 360 degrees of fresh and clean air.

TURN THE NEGATIVES INTO POSITIVES

At any given moment, there are a number of microscopic pollutants swirling around in the air you breathe, especially when spending time indoors. Your home, office, gym, classroom or virtually any indoor space can be circulating air that's up to five times more contaminated than the air outside*. That's where the Puritii Multi-Effect Air Purifier comes in, utilizing innovative technology to pull in the pollutants and put out only clean, purified air.

When you choose the Puritii Multi-Effect Air Purifier, you can feel confident knowing you're improving your everyday air quality by removing indoor pollutants like carbon monoxide, pollen, mold, dust mites, volatile organic compounds and other chemicals that can contribute to many health concerns*. There's even a Negative Ions Mode that releases millions of beneficial molecules into the air — 2.36×10^7 ions/cm³ to be exact. But don't let the name fool you: Negative ions actually have a positive impact on the air you breathe!

VERSATILE DESIGN

The Puritii Multi-Effect Air Purifier was designed with you and your family in mind. Some filters catch pet dander, hair and dust, while others eliminate chemicals and odors ... but this one does it all! It's also safe enough to be used around the tiniest members of your home, four-legged friends included! With an added child lock feature, your filtration settings can stay secure even near the most curious toddlers.

ADVANCED FUNCTIONALITY

1. **AI Mode:** Adjust the speed automatically based on the air quality
2. **6 Manual Speed Options:** From Sleep Mode (lowest) to Ultra-Speed Mode (highest)
3. **Ultra-Speed Mode:** Highest power option
4. **Timer:** Set from 1 hour up to 24 hours
5. **Child Lock:** Keep your settings secure
6. **Filter Replacement Reminder and Reset:** Icons indicate when replacement is needed
7. **Sleep Mode:** Lowest power option
8. **Negative Ion Mode:** Releases negative ions into the air for improved benefits
9. **PM2.5 Digital Display:** Shows current amount of PM2.5 in the air
10. **TVOC (Total Volatile Organic Compounds) Display:** 5-level bar indicator visually depicts any VOCs in the air
11. **Temperature and Humidity Display:** Real-time stats
12. **Remote Control:** Convenient access

FREQUENTLY ASKED QUESTIONS

WHAT DOES PURITII REMOVE FROM THE AIR?

Puritii removes all three pollutant categories with up to 99.99% efficiency, including:

- Ultrafine particulates which are less than 0.1 microns, including cigarette smoke, pollen, dust and dust mite residue, and pet dander.
- Volatile organic compounds (VOCs) from smoke, odors, exhausts, fumes and chemicals.
- Airborne bacteria, mold, fungi and viruses.

HOW BIG IS THE PURITII MULTI-EFFECT AIR PURIFIER?

Each unit weighs approximately 39 pounds and measures 15.75 x 16.14 x 34.25 inches (40 x 41 x 87 cm), similar in size to R2D2.

HOW MUCH SPACE CAN THE PURITII MULTI-EFFECT AIR PURIFIER CLEAN?

The amount of space the system cleans and the rate at which it cleans depends on the setting you choose (six fan speed options). When utilizing the highest filtration mode, the Puritii Multi-Effect Air Purifier can clean up to 426.9 cubic feet per minute.

HOW OFTEN DOES THE FILTER NEED TO BE REPLACED?

About every three months, a light on the control panel and a soft beeping alarm will alert you that it is time to check the filters inside. Depending on the quality of your air and the frequency of use, however, you may not need to replace the filter at that time. Take the time to inspect both the pre-filter and the main filter for visible signs of pollution accumulation. The pre-filter can be rinsed or vacuumed and re-used. If the main filter is dirty, dispose of it with your regular trash and replace with a new one.

Even if the main filter looks clean, we recommend replacing it every 6–12 months. Though not visible to the naked eye, the VOC removal stage can become saturated, after which the filter will be less effective at removing these pollutants.

FREQUENTLY ASKED QUESTIONS

HOW MUCH WILL IT COST TO RUN THE PURITII MULTI-EFFECT AIR PURIFIER?

The Puritii Multi-Effect Air Purifier is extremely energy efficient. Utility costs vary by location, but using the U.S. national average utility rate of \$0.12/kWh, if the machine runs for 24 hours per day, 7 days per week, you will only pay approximately \$84.31 USD/year when using the highest setting (80.2 Watts). Keep in mind, you definitely don't need to keep it running all day and all night — you'll experience the benefits even with intermittent use!

CAN I USE PRIIME ESSENTIAL OILS® WITH THE PURITII MULTI-EFFECT AIR PURIFIER?

When Priime Essential Oils are diffused, they are turned into tiny droplets that float in the air, making it possible to smell them when you inhale. These droplets will be filtered out of the air when they pass through the highly efficient filters of the Puritii Multi-Effect Air Purifier. To maintain the aroma of Priime Essential Oils, you can:

1. Place your Priime diffuser on top of the system. Because the top of the system blows clean air, you will better circulate and distribute your oils throughout the room.
2. Place your Priime diffuser on the opposite side of the room from the unit. Since the Puritii Multi-Effect Air Purifier takes time to fully clean a room, a Priime diffuser on the opposite side of the room will disburse oil evenly in the air while the system filters the air on the opposite side.

WHY IS MY AIR QUALITY NOT SIGNIFICANTLY IMPROVING?

There could be a few reasons including:

1. The filter is incorrectly installed.
2. The filter requires a replacement.
3. The unit is placed in a corner or blocked area.
4. The unit is in sleep mode.

CAN I SELL THE PURITII MULTI-EFFECT AIR PURIFIER TO HOSPITALS AND CLINICS? IS IT MEDICAL GRADE?

The Puritii Multi-Effect Air Purifier can be sold to clinics, retirement homes, veterinary institutions and any other medically oriented institution based on the institutions' individual regulations. The system has been thoroughly tested to remove more than 99.99% of fine particles and up to 99.99% of VOCs like aldehydes and benzenes, making it a necessary addition to every clinic, office, classroom, nail salon, gym, restaurant, etc., but especially every home.
